Why do we need a new Global Strategy for Food Safety?

Drivers of change impacting food safety systems

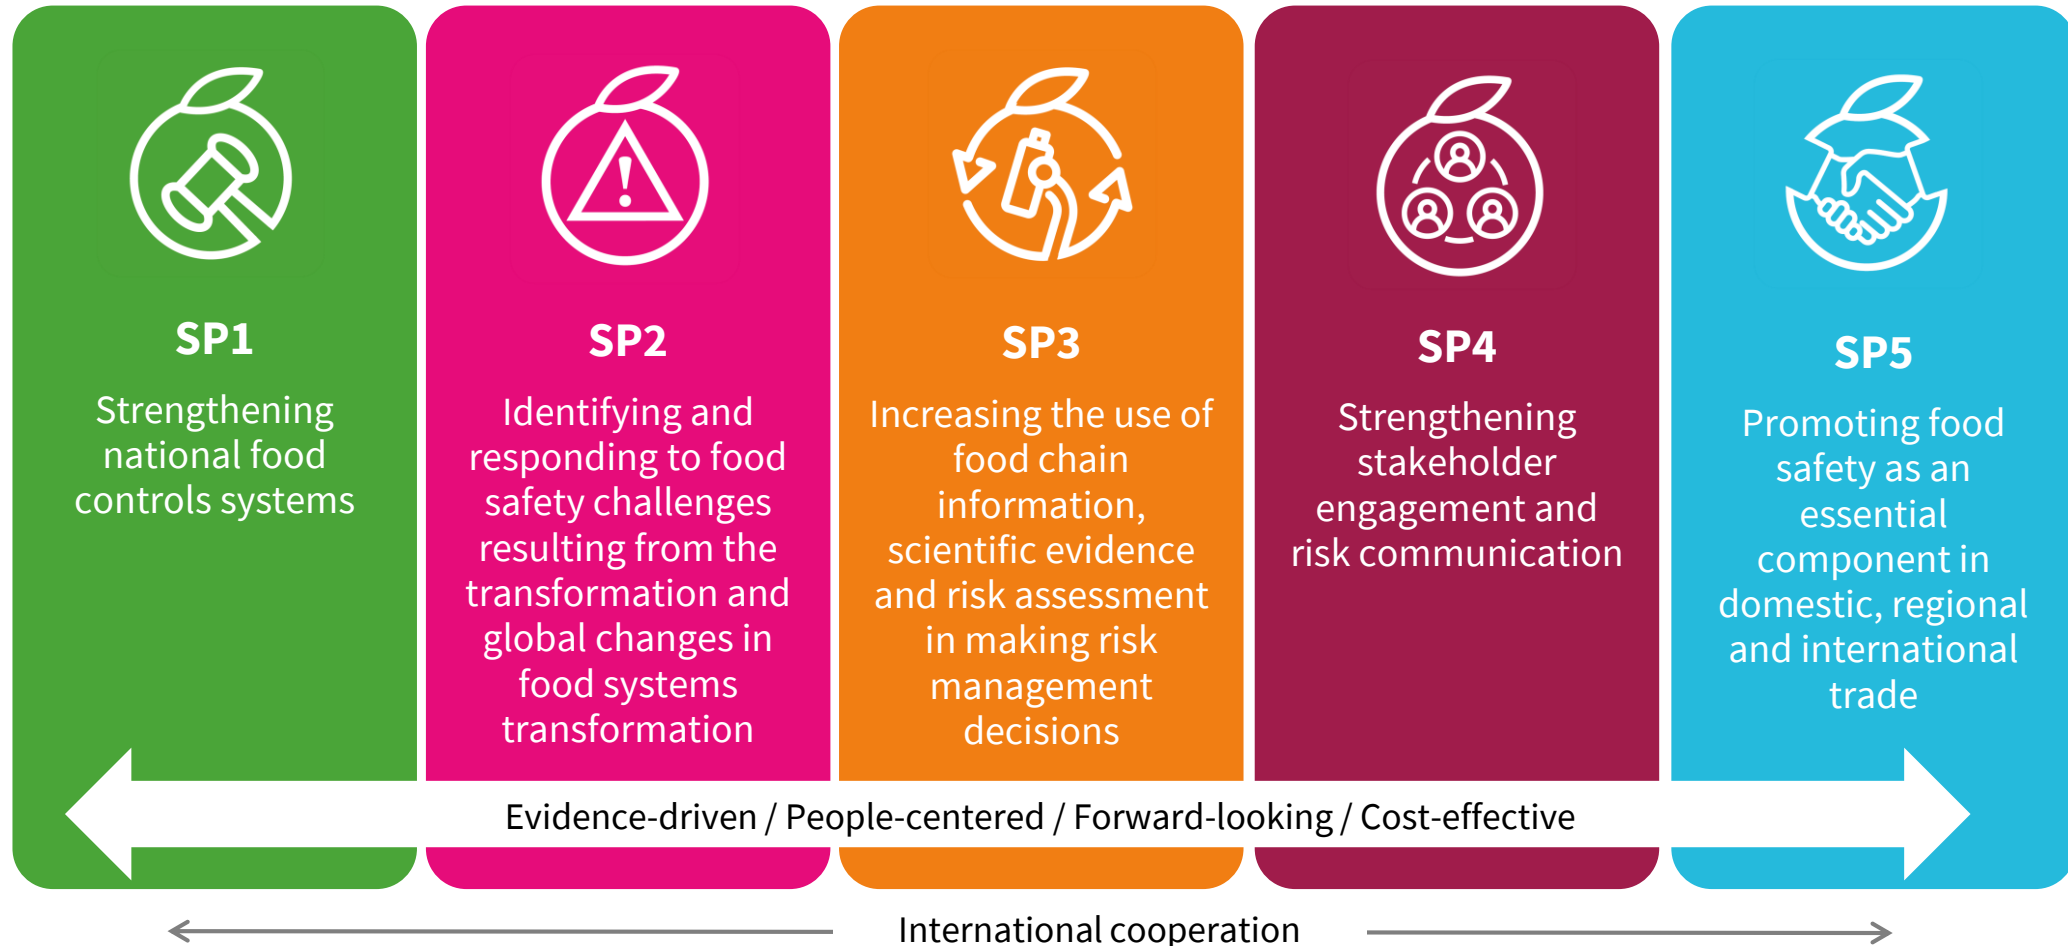

WHO Global Strategy for Food Safety: 2022-2030

- **Vision:** To ensure that **all people, everywhere**, consume safe and healthy food.
- **Focus:** Strengthen **multisectoral collaboration** and **innovative** public health approaches.
- **Implementation:** WHO will work with Member States and partners to modify, redesign or strengthen their national food safety systems in **five strategic priority areas**.

Overview of the Strategic Priorities (SP)

What we want to achieve with the strategy in 2030

Indicator	Type	Source	Indicator as of 2022	Target by 2030
 <p>Foodborne diarrhoeal disease incidence estimated per 100 000 population</p>	Outcome indicator (impact)	WHO global estimates on foodborne disease burden informed by FERG	4 154	40% reduction in the global average
 <p>Multisectoral collaboration mechanism for food safety events</p>	Capacity indicator (progress)	International Health Regulations (2005): State Party Self-Assessment Annual Reporting Tool	57% of countries with at least 80% capacity	100% of countries with at least 80% capacity
 <p>Surveillance of foodborne diseases and contamination</p>		International Health Regulations (2005): Joint External Evaluation Tool	1.5	Global average capacity score 3.5

Expected impact: 2030

40%

Reduction in the estimated global average of foodborne diarrheal disease / 100 000 hab.

Ways to achieve the targets

**WHO
GLOBAL
STRATEGY
FOR FOOD
SAFETY
2022-2030**

World Food Safety Day is June 7, 2023

In recognition of this day to increase awareness about food safety, IAFP will provide **open access from June 1–30, 2023,** to all recorded webinars in the IAFP archives for non-Members.

IAFP non-Members can browse the webinar archives on our [website](#) where **more than 100 webinars** dating back to 2009 are located (log-in not required).

One of the many benefits of IAFP Membership is access to the Association's **free webinars**, which are sponsored by the IAFP Foundation.

Not a Member? Consider joining today. [Go here](#) to learn more.

Upcoming Webinars

- June 14, 2023 Dry Cleaning: Is Water Friend or Foe in Food Safety and Sanitation?
- June 15, 2023 Tech-Enabled Traceability: Get Ready For FSMA 204 With GS1 Standards
- June 22, 2023 Using Science and Technology to Reduce Food Waste and Ensure Food Safety
- June 27, 2023 Don't be Shellfish! Use Next Generation Sequencing to Improve Seafood Safety and Quality
